

NCI Current Engineering Projects Spring 2011

Current Condition of Belt's Water Tank

The Town of Belt

Water System Improvements (Water Tank)

NCI prepared a Preliminary Engineering Report (PER) as well as DNRC, TSEP, STAG, and WRDA grant applications, for Belt's water system improvements. Belt owns an aging water system. The Phase 1 improvements will install 273 water meters and a 250,000 gallon water storage tank. Belt is currently ranked 20th out of 110 DNRC RRGL Grant projects, and is awaiting the ranking of their TSEP application. Belt anticipates funding by the 2011 legislature.
